

# Detect Temporal Anomaly

## Chronomancy

Level: 1

Range: 0

Components: V, S

Casting Time: 1

Duration: 2 rds./level

Area of Effect: Special

Saving Throw: None

When this spell is cast, the chronomancer is attuned to turbulence in the time-stream and can scan a 90-degree by 90-degree area (one eighth of a sphere) every round. After locating an anomaly, the severity can be determined by another round of concentration. The wizard has a 5% chance per level to recognize the cause. On the Demiplane of Time, distance is not a factor, and the spell detects the nearest turbulence in any scanned direction. On the Prime Material, the range is 30 yards per level. In either case, sight is also a limiting factor.

Notes: Restricted to chronomancers; common.
